SUMMARY

Full-Stack Web Developer with experience building cloud-native SaaS platforms and responsive web applications using Python, JavaScript, Vue.js, Node.js, and modern cloud technologies. Skilled in RESTful APIs, front-end frameworks, databases, and CI/CD pipelines to deliver efficient, scalable, and user-focused solutions.

TECHNICAL SKILLS

Languages	: Python, C#, Java, JavaScript, HTML, CSS, C/C++
Frameworks	: Vue.js, ASP.NET, .NET, React.js, Express, Node.js
Libraries	: Tkinter, CustomTkinter, Sequelize
Databases	: MongoDB, PostgreSQL, MySQL, Azure SQL, Firebase Firestore
Dev Tools	: Visual Studio Code, Git, Docker, Azure, Google Cloud Run, CI/CD Pipelines

EXPERIENCE

Full-Stack Web Developer <i>Share2Teach SaaS Platform</i>	Feb 2024 – Nov 2024 <i>Hybrid</i>
- Designed a cloud-native platform with 4 user roles and secure OAuth 2.0 authentication - Developed a RESTful API (35+ endpoints) with Node.js, Express, and Sequelize for document management, moderation, and analytics - Built dynamic Vue.js frontend with role-specific views and Vue Router navigation, supporting search, dashboards, and document workflows - Optimized Azure SQL schemas, integrated Azure Blob Storage, containerized services with Docker on Google Cloud Run, and implemented CI/CD pipelines	
Web Developer <i>Casita Express</i>	Dec 2023 – Feb 2024 <i>Remote</i>
- Developed and launched a fully responsive restaurant website using HTML, CSS, and JavaScript, improving online visibility and increasing customer inquiries by 40% - Designed an interactive digital menu and optimized UI/UX layout, reducing bounce rate by 35% and improving user engagement - Enhanced website performance through front-end optimization techniques, decreasing page load time by 50% and improving overall user experience	

EDUCATION

North West University <i>Bachelor of Science in Information Technology</i>	Potchefstroom, NW <i>Completed</i>
--	---------------------------------------

PROJECTS

Chat Room App	<i>Python, Tkinter, Firebase, Firestore</i>	Source Code
- Built a real-time chat application with private and group messaging using Firebase Firestore for data storage and synchronization - Developed a responsive Tkinter + CustomTkinter GUI with login/signup, chat creation, message display, and user management features - Implemented real-time updates with Firestore snapshot listeners and secure user authentication - Integrated CRUD operations for users, private chats, and group chats, enabling dynamic member management and message persistence
